

Meesho ReLoop: recover value today, build the sourcing rail tomorrow

A two-way B2B marketplace: first convert RTO, damaged and ageing stock into verified recovery lots; then use the resulting supplier, buyer and price graph to help Meesho sellers source fresh inventory at trusted landed prices.

WHY THE IDEA CHANGED

Sellers rejected another BI/CRM subscription. They valued two cash outcomes: recover money from unsellable stock, then procure the next batch at a trusted landed price.

"I still have a bag full of it. It's a waste for me."

Seller, interview

ONE NETWORK, TWO DIRECTIONS

THE NETWORK MEESHO ACTUALLY HAS

- 1.04m sellers: Meesho says they include manufacturers, wholesalers and traders, but publishes no segment-wise wholesaler count.[1]
- 4.1m retailer seed: Kirana Club is a B2B discovery and ordering network. It is a recruitment pool - not proof that 4.1m recovery buyers are ready.[2]
- 18k logistics providers: Valmo gives ReLoop a partner network for pickup, scanning and cross-docking after a lot sells.[3]
- Price + demand data: Meesho already recommends prices and products. ReLoop adds missing B2B realised-price, condition and procurement signals.[1]

WHY THIS IS ONE IDEA - NOT TWO PRODUCTS

PHASE 1: RELOOP RECOVERY	PHASE 2: MEESHO SOURCE
Creates verified buyers, supplier performance, manifests, landed recovery prices and category liquidity.	Reuses the same identities, RFQ engine, escrow, quality rules, payments and Valmo movement for fresh inventory.
Amazon Liquidation and B-Stock prove graded lots, manifests, auctions and buyer premiums.[4][5]	Amazon Business, Udaan and Faire prove verified B2B buying, bulk prices, invoices and supplier-funded acquisition fees.[6][7]
LOCKED PRINCIPLE	Recovery earns trust; sourcing supplies scale. Neither requires Meesho to own inventory or charge commission on B2C sales.

The marketplace is virtual before sale; physical movement begins only after payment

This custody choice protects Meesho’s asset-light model while preserving buyer trust through staged verification and transparent manifests.

ASSET-LIGHT CUSTODY + VERIFIED B2B NETWORK

SELLER-HOLD UNTIL SALE

Seller keeps stock until a lot sells; early hub collection creates storage, double-handling and shrinkage. After buyer prepayment, pickup, verification and cross-dock happen in one route.

WHOLESALE NETWORK BUILD

Start with Meesho manufacturers/wholesalers, recovery buyers and category associations; add relevant Kirana Club brands/retailers. Public data does not disclose a ready wholesaler count.

FIVE-LAYER VERIFICATION

GST/PAN/Udyam + bank ownership; address/warehouse proof; invoices and category licences; paid sample order; then a live score for fill rate, defects, dispatch and disputes.

CONTROL SYSTEM: FROM A PHOTO TO A BUYER-READY LOT

One B2B identity powers recovery selling, recovery buying and fresh sourcing

ReLoop begins with a 90-second recovery listing. After liquidity and price data mature, the same verified network opens Meesho Source through RFQs, group-buying and protected payment.

PAY IN-APP TO KEEP GRADE, ESCROW, CLAIMS, PRICE PROTECTION + VALMO TRACKING

TRUST CONTRACT EMBEDDED IN THE PRODUCT

RECOVERY SELLER

Winning bid is paid in full, allocated by accepted units. ReLoop is voluntary and never replaces a valid RTO, damage or loss claim.

B2B BUYER / SOURCER

Recovery lots show grade confidence and manifest. Fresh-stock RFQs compare landed prices, MOQ, fill rate, dispatch SLA and GST status.

ANTI-LEAKAGE

Mask identity before PO; after invoicing, keep repeat trade on-platform through escrow, claims, rebates, credit and Valmo tracking - not forced secrecy.

Recovery proves trust; sourcing creates the path to approximately 1% of NMV

The seller gets the winning recovery bid and free core sourcing. Meesho earns only when it creates an incremental B2B transaction or verified saving; logistics, ads and credit are excluded from the model.

PHASE 1 - RELOOP RECOVERY

Seller payout: 100% of the winning bid value for accepted units. Meesho revenue: buyer-funded 10-15% Trust Premium for verified grade, pooled supply, manifest, escrow and claims. Valmo movement is shown separately at cost.

Benchmark: B-Stock applies a 10% buyer premium; Amazon India already liquidates returns, overstock and transport-damaged stock.[4][5]

PHASE 2 - MEESHO SOURCE (MONTH 6-8)

Core is free: verified RFQs, landed-price comparison, MOQ, GST invoice and supplier score. Revenue: 2.5-5% new-buyer acquisition fee from wholesalers plus an optional seller Group-Buy fee equal to 15-25% of verified savings, capped at 1% of order value.

Benchmark: Faire charges brands 15% on marketplace orders; IndiaMART monetises supplier subscriptions. ReLoop uses a lower, transaction-linked fee.[7][8]

SCENARIO MODEL - ANNUALISED STEADY-STATE RUN-RATE

FY26 NMV = ₹41,560 cr; 1% benchmark = ₹416 cr.[1]

ASSUMPTION / OUTPUT	LOW	BASE	HIGH	METHOD / BASIS
Seller procurement value / NMV	45%	55%	65%	Assumption: procurement cost before marketplace selling
Procurement routed through Source	15%	35%	50%	Share of seller procurement completed on-platform
Blended Source fee	3.0%	4.5%	6.0%	Wholesaler acquisition fee + optional savings-share
A. SOURCE REVENUE	₹84 cr	₹360 cr	₹810 cr	NMV x procurement % x routed % x fee
Valmo share / weighted RTO	50% / 17%	60% / 17%	70% / 17%	17% = 80% COD x 20% RTO + 20% prepaid x 5% RTO[9]
RTO eligible / opt-in / sell-through	15/25/50%	25/40/65%	35/55/75%	Scenario assumptions; excludes normal resale-ready returns
Ageing stock / listed share	5% / 20%	8% / 35%	12% / 50%	Stock pool as % NMV; requires buyer interviews to validate
Recovery price / buyer premium	25% / 10%	35% / 12.5%	45% / 15%	Realised value as % original price; fee on cleared lot value
B. RELOOP REVENUE	₹7 cr	₹45 cr	₹174 cr	RTO recovery + ageing/overstock recovery
TOTAL RUN-RATE	₹91 cr	₹405 cr	₹985 cr	0.22% / 0.97% / 2.37% of FY26 NMV
YEAR-1 REVENUE	₹10 cr	₹92 cr	₹348 cr	Ramp factors: ReLoop 30/45/60%; Source 10/20/30%

SEQUENCE AND SCALE GATES

0-90 DAYS	MONTH 3-6	MONTH 6-8	MONTH 9-12
Recovery pilot: 100 sellers, 30 verified buyers, 2 categories, seller-held lots.	Add 3 cities, factory seconds and category buyers; train realised-price curves.	Closed Source beta: verified wholesalers respond to seller RFQs and pooled demand.	Scale group buys; supplier score, escrow and Valmo tracking protect repeat trade.
Gate: 3+ bids on 60% of lots; grade variance <=10%	Gate: 70% sell-through in 14 days; repeat buyers >=35%	Gate: 3 quotes on 70% RFQs; median landed saving >=5%	Gate: 95% fill rate; 70% repeat orders stay on-platform

ZERO-COMMISSION GUARDRAIL: no deduction from a seller's Meesho consumer-sale proceeds. Every ReLoop/Source fee is disclosed in a separate B2B checkout and charged only for new verification, recovery or procurement value.
